

October - December 2009

IBA Named Brand of the Year 2009

IBA was selected a winner of the Belarusian national contest *The Brand of the Year* in the category *Socially Responsible Brand*. Named *The Best Employer*, IBA was awarded a gold medal and honorary diploma at the award ceremony held on December 22 in Minsk, Belarus. The category *Socially Responsible Brand* was instituted in 2005 by the Initiative *For Social Responsibility of Business* with support from the United Nations Development Programme in Belarus within the UN Initiative *Global Compact*.

IBA Reappointed as IBM Premier Business Partner

Based on results of the audit by IBM PartnerWorld Contact Services, IBM reappointed IBA as its Premier Business Partner. A certificate issued in recognition of the IBA's continued commitment to excellence in delivering IBM solutions was signed by Rich Hume, IBM Global Business Partners General Manager.

IBA Appointed IBM Tivoli A-Level Deployment Accredited Business Partner

IBM appointed IBA as Tivoli A-Level Accredited Business Partner in Tivoli Storage Manager. With the new Tivoli Deployment Accreditation initiative, IBM Business Partners who have made significant investments in developing their skills earn one of three levels of accreditation status, namely: A, AA or AAA. The A-level Tivoli Deployment Accreditation stipulates that an organization has one Certified Solution Advisor within a specific solution area and one Certified Deployment Professional in an individual product.

IBA Mobile Banking for Belagroprombank

IBA completed the implementation of the IBA Mobile Banking system at Belagroprombank, a leading Belarusian bank. The IBA Mobile Banking enables holders of plastic cards issued by Belagroprombank to make payments and retrieve banking information via mobile phone, Smartphone or PDA.

IBA Implements New Subsystem at Belarusian Railway

On November 27, IBA successfully put into production the subsystem *Field Operation Management Model* of the Corporate Information System of Belarusian Railway. The new subsystem streamlines numerous business processes of the client, including:

- Management of cargo and passenger transportation
- Generation of daily status reports
- § Registration of car maintenance and car rental operations
- § Planning of shipments.
